The aim of this series of papers is to present modern methods of linguistics and language pedagogy concerning specific-purpose language competences and, applying them to English for Border Guards (EBG), to describe the English competences to be developed at language courses for border guards in EU member states and to explore the prospects for their improvement. Having discussed the dilemmas and methodology related to the definition of specific-purpose language competences and to needs analyses, indispensable for language course design in the first part of the series, the further parts wish to prove that the ongoing FRONTEX project entitled English Communication for Border and Coast Guards very well illustrates how the new approach to needs analysis methods is used to define the English language skills needed for border control in the EU. The author also presents that, based on the authentic material provided by border guards, the ESP competences needed for their work can be defined according to the categories used in applied linguistics and the Common European Framework of Reference for Languages. Due to the length limits of this paper, this part will only discuss elementary and intermediate (A2/B1) EBG competences.

Keywords: English for Specific Purposes, BCG training, FRONTEX, CCC, online course, communicative language competences, linguistic, sociolinguistic and pragmatic competences

The first part of this series of papers discussed the dilemmas and methodology related to the definition of specific-purpose language competences and to needs analyses, crucial for language course design in general and their application in the context of English for Border Guards.

https://orcid.org/0000-0002-9938-6980, borszeki.judit@uni-nke.hu

2 For the purposes of this paper, I am using the term ‘competence’ in the sense as it is used in the CEFR and not as in e.g. the SQF for Border Guarding.
In the further articles of the series I wish to prove that the ongoing FRONTEX\(^3\) project entitled *English Communication for Border and Coast Guards* (hereinafter: ECBCG) very well illustrates how the new approach to needs analysis methods, similar to the one showcased in the first part of this series of papers is used to define the English language skills needed for border control in the EU.

My other hypothesis is that, based on the authentic material provided by border guards, using the system approach, the ESP\(^4\) competences needed for their work can be defined according to the categories generally used in applied linguistics and the CEFR.\(^5\) Due to the length limits of this paper, here I will discuss elementary and intermediate (A2/B1)\(^6\) EBG\(^7\) competences, now called ‘Level 1’ in the ECBCG FRONTEX online course first, to be followed by upper-intermediate and advanced ones (B2/C1, Level 2) in the third part.

**The Problems of Defining English Skills for Border Guards in FRONTEX**

The special nature of foreign language competences and thus of language learning (as compared to other job competences) was recognised by the developers of the SQF\(^8\) for Border Guarding, also as a result of similar considerations in the EU:

“... *language learning and competence does not align to the levels of the SQF in terms of complexity of learning. The Common European Framework of Reference for Languages: Learning, Teaching, Assessment (CEFR) addresses this issue. As the CEFR does not align to the EQF\(^9\) it is not possible to have language learning outcomes in the SQF. All learning in relation to languages should be described in terms of the level of the CEFR and not the ‘communication skills’ outcome of the SQF. The language requirements for border guards are reflected in the 'job competence profiles’ to reflect this essential learning requirement.”\(^10\) In the job competence profiles of the SQF, the ability to *communicate effectively in other languages* is defined as a skill for each level (4, 5 or 6). The proficiency level is described as one that should be in accordance with national policy commensurate with the actual level of border guarding activities.

3 European Border and Coast Guard Agency.  
4 English for Specific Purposes.  
5 Common European Framework of Reference for Languages.  
6 This is different, for example, from the practice at the NUPS, Budapest, where the lowest level at which English for Law Enforcement is taught is B2. See Úrmósné Simon (2018).

7 English for Border Guards – the term used in FRONTEX, which, after the establishment of the European Border and Coast Guard was changed into English for Border and Coast Guards.

8 Sectoral Qualifications Framework.

9 European Qualifications Framework.

The importance of English language skills for border and coast guards is constantly underlined by the fact that an ever-expanding section has been devoted to the development of these competences in every edition of the CCC since its first publication. As the introduction to the Generic Studies of the latest, 2017 edition says:

“Apart from performing their tasks and duties in their national language, border and coast guards must also prove their proficiency in English, the EU official language, in order to be able to serve all the persons involved in regular or irregular border crossing and also to cooperate with their foreign counterparts in joint operations. So the last chapter in generic studies provides the framework for the professional BCG English language training envisaged as common to all border and coast guards and is closely linked to the particulars of professional English language training chapters in the different modules for land, air, and sea borders.”

As a consequence of the abovementioned impossibility to align language competences to the SQF, unlike in the case of the other chapters and subjects of the CCC, the targeted job competence of Subject 1.7, called Professional English language training is not formulated in terms of the SQF competence profiles or the so-called adjusted job competences of the CCC but a special job competence was created, solely for this subject: “Communicate effectively in English in accordance with national policy commensurate with routine, non-complex border guarding activities.”

The learning outcomes of the subject are not aligned to SQF job competences, either. Similarly, the categories of learning outcomes used for the other subjects, such as ‘Knowledge’, ‘Skills’ and ‘Competences’ are not used. At the same time, the application of the CEFR can practically only be traced in the definition of the suggested proficiency level: “It is recommended that English language proficiency is aimed at level B1 in accordance with common European CEFR Level Framework of reference for languages of the Council of Reference Europe in consideration of specific needs.” Mainly due to the limits on the scope of the CCC, the learning outcomes are formulated as “Upon successful completion the border guard is able to use the English vocabulary related to” the various topics listed below, which can be considered topics and notions within this particular ‘occupational’ domain (according to CEFR terminology), as follows:

1.7.1 Personal and professional presentation
1.7.2 Organisation, competences and equipment
1.7.3 General definitions and specific border guard terms
1.7.4 Fundamental rights
1.7.5 Border checks
1.7.6 Cross-border crime
1.7.7 International protection procedures

Language functions are mentioned at times, in the *Recommended indicative content* section of certain topics e.g. informing persons, describing people and objects, polite requests, identifying a request, requests and orders, asking questions to verify the authenticity of data, consulting a foreign colleague on suspicious documents, asking and answering questions to victims and witnesses, explaining actions etc. Also, assessment is formulated by using verbs such as (the border guard) distinguishes, presents, explains, communicates etc. For detailed description of the recommendations concerning the skills to be achieved upon the successful completion of border and coast guard basic training, see Appendix 3.

The formulation of learning outcomes that focus almost solely on vocabulary and terminology certainly reflects a layman’s (non-linguistic) approach but this definition of the learning content in the CCC, the detailed list of professional topics is very useful as a starting point for defining the English language competences border guards working in the EU need. Thus, it provided useful guidelines for defining the topics and situations to be covered in the ECBCG online language courses, especially Level 1.

The development of Level 1 started in 2015. I was a member of the working group of border guards and English teachers (with several years’ experience in the field) designated by FRONTEX for the development of the learning material. First we defined its structure, similar to that of the CCC, i.e. consisting of a General Part followed by three modules that correspond to the three types of external borders (Air, Land and Sea). Material from a previous e-learning device entitled *Basic English for Border Guards at Airports* was selected. Apart from this, experienced border guards deployed at the various types of borders were invited to produce dialogues they have in English during work and to make lists of vocabulary they use in typical professional situations. Thus, instead of a ‘traditional’, ‘top-down’, questionnaire-based needs analysis, often

---

16 Ibid. 80–84, 223, 248, 263, 300, 310, 317.
focusing on linguistic forms, gathering data about the learner and not from the learner – mentioned in the first paper of this series –, in this case focus was on discourse and communicative events, using a 'bottom-up' approach. It was task-based because the situations were built on border guards’ everyday activities, which they can perform with success only if they use their English language skills appropriately and efficiently. In this way we gained the same information and corpora that we would have gathered using the CEF Professional Profile, visiting border crossing points, listening to and recording or noting down border guards’ conversations, which, due to security considerations, is actually not feasible.

Self-access e-learning courses have limitations because the learner can only interact with an electronic device, therefore the aim of these programmes is to help the user to develop his/her vocabulary and listening and reading skills. With this in mind, the 126 dialogues (called ‘scenarios’ in the courses) that serve as the context for presenting the target vocabulary and phrases and linguistic models in typical situations are grouped into subunits and units according to the various fields of border guards’ activities. Appendix 1 shows the topics presented in Level 1.

For Level 1 the situations requiring A2/B1 level of English were selected. Most of them correspond to the most typical first-line border control activities. Thus, they usually end at the point where the border guard e.g. establishes a problem that needs further investigation so he/she will need to refer the passenger or migrant to the second line, where activities usually also require a higher level of proficiency in English. A smaller part of the dialogues represents simple information exchange with members of the team, i.e. foreign colleagues deployed at the external border for a joint operation.

As I have mentioned before, the material is designed for self-access learning, targeting a limited range of communicative competences. The user is advised to listen to the video or audio recordings of the scenarios, check understanding with the help of listening comprehension exercises and then he/she can do a large number of exercises to memorise target vocabulary and sentences, which are followed by assessment tests after each module. As we can see, spoken and written production cannot be intensively developed with such e-learning tools, in which the tasks must not be open-ended ones so that immediate feedback can be provided.

Consequently, in the FRONTEX ECBCG course the tasks are pre-communicative ones and are structured in a way that give a good opportunity for the learners to practise the target vocabulary but, in order to develop speaking skills, this should be followed by the next phase, that is the independent use of what has been learnt. Fortunately, the border guards that constitute the target group of the course can make this happen during their everyday work. In their case, it is the achievements in real-life communication (that is, whether they reach their pragmatic and other purposes) that will show whether they have really managed to develop their language skills. These achievements may have a very strong motivational force and, the feeling that they can cooperate with passengers more easily and efficiently will lead to the learners’ more confident professional presence. However, proper linguistic feedback and the profes-
sional correction of mistakes can only be provided by an English teacher, in simulations resembling real-life situations that also involve the essential unexpected elements in communication.\textsuperscript{18}

Despite the fact that the scenarios are used for developing only certain skills, they can also be considered recorded corpora, models for language use, and this way, through their analysis we can also make reliable assumptions about the communicative language competences needed for border control activities. The topics and the situations in the ECBCG courses provide the ‘external situational context’ of the communication we want to examine.

**Elementary and Pre-intermediate (A2, B1) ESP\textsuperscript{19} Competences Border Guards Need**

By comparing the corpora and the recommendations in the relevant chapters of the CCC with the CEFR scales of descriptors,\textsuperscript{20} I compiled a version of the description of productive, receptive, grammatical, lexical, pragmatic, functional and sociolinguistic ESP competences necessary for border guards when communicating with passengers or foreign colleagues.

The descriptions are illustrated by the collection of vocabulary and phrases of the OCBCG course in Appendix 2 and by sample dialogues in Appendix 4, indicated in the tables.\textsuperscript{21}

**Competences needed for productive and receptive communicative activities**

These are the general competences necessary for the border guard (working in the first line) to create oral texts and to understand oral and written texts. Based on the model dialogues we can establish that while interacting in professional situations, the A2/B1 user of English for Border Guards acts alternately as speaker and listener with one or more interlocutors so as to construct a conversational discourse together, through the negotiation of meaning following the co-operative principle. Based on CEFR descriptors, during overall spoken interaction, conversation, formal and informal discussion, goal-oriented co-operation (e.g. to solve a problem), information exchange and oral mediation (summary, paraphrasing), I propose that the abovementioned user’s communicative abilities can be defined by the descriptors presented in Table 1. During these activities the abovementioned user also uses strategies for

\textsuperscript{18} Borszéki (2014) 118.

\textsuperscript{19} English for Specific Purposes.

\textsuperscript{20} Council of Europe, Language Policy Division (2001) 84–130.

\textsuperscript{21} I selected 14 typical dialogues from Level 1 of the OCBCG material (Frontex [2018]) as samples. As the material is strictly for law enforcement use, I can only publish three of them here. The complete set of dialogues can be found in Appendix 5 of my PhD dissertation (Borszéki [2016]).
interaction (planning, execution, evaluation and repair) at his/her proficiency level, which cannot be described here in detail.\textsuperscript{22}

</tr>
</thead>
<tbody>
<tr>
<td>Can communicate without too much effort on familiar routine and non-routine matters related to his/her professional field and in simple, routine tasks. Can easily ask and answer questions in everyday, structured professional situations. Using simple language and terminology, he/she can exchange, check and confirm information and can explain why something is a problem.</td>
<td>Dialogues 1, 2</td>
</tr>
<tr>
<td>Can establish social contact (greetings and farewells; introductions; giving thanks). Can use simple everyday polite forms of greeting and address. Can make and respond to invitations, suggestions and apologies. Can generally understand clear, standard speech on familiar professional matters directed at him/her, can take part in such short conversations. Can respond to feelings such as worries, impatience etc.\textsuperscript{23}</td>
<td>Dialogue 5</td>
</tr>
<tr>
<td>During informal discussions he/she can express his/her thoughts about familiar professional topics. Can explain why something is a problem. Can make suggestions as regards practical questions of where to go, what to do etc. Can generally follow the main points, provided speech is clearly articulated in a standard dialect. Can express belief, opinion, agreement and disagreement politely.</td>
<td>Dialogues 3, 5, 7</td>
</tr>
<tr>
<td>Can use appropriate technical terminology, when discussing his/her area of specialisation with other specialists.\textsuperscript{24} Can exchange relevant information related to his/her special field and can give his/her opinion on practical problems when asked directly, can make comparisons.</td>
<td>Dialogue 9</td>
</tr>
<tr>
<td>Can explain why something is a problem during goal-oriented co-operation in professional matters (e.g. border checks) and discuss what to do next. Can give directions.</td>
<td>Dialogues 2, 10, 13</td>
</tr>
<tr>
<td>Can find out and pass on straightforward factual information related to topics, can offer advice on simple matters\textsuperscript{25} within his/her special field. Can give and follow simple instructions and series of instruction in familiar professional contexts. Can ask and answer simple questions about his/her work.</td>
<td>Dialogues 11, 14</td>
</tr>
<tr>
<td>Can give a simple description or presentation of a variety of subjects as a short series of simple phrases and sentences as a linear sequence of points. Can give a simple description or presentation of people, living or working conditions and daily routines.</td>
<td>Dialogues 7, 12</td>
</tr>
</tbody>
</table>

\textsuperscript{22} This has been established following the empirical observation of border guards’ activities. Due to the special circumstances in which the corpora were created by border guards for the ECBCG material, the model dialogues usually lack the unexpected elements so typical of everyday communication, as well as the forms reflecting interactive strategies.

\textsuperscript{23} Due to the (required) official and objective style, no other emotions are manifested during communicating with passers. A limited circle of other emotions may be present when talking to colleagues.

<td>Dialogue 2, 6, 8</td>
</tr>
<tr>
<td>Can intervene in a discussion on a familiar professional topic. Can indicate when he/she is following. Can exploit a basic repertoire of language and strategies to help keep a conversation or discussion going.</td>
<td>Dialogues 1–14</td>
</tr>
</tbody>
</table>

It is obvious from the analysed sample dialogues that the border guard also conducts visual perception (reading) activities at times, acting as the receiver of written texts. This competence can be formulated as follows: Can understand short, simple texts on familiar professional matters of a concrete type or can find important information in similar, longer texts that consist of high frequency job-related language. (E.g. invitation document, hotel reservation, car rental documents, parental declaration giving consent to a minor’s journey abroad etc.)

The competences that follow are illustrated by all the dialogues and the lists of vocabulary and phrases in Annex 2.

**Linguistic (language) competences**

As we can see in the below figure, apart from the competences needed for the above-mentioned types of communicative language activities, the language user also needs communicative language competences to perform speech acts.

---

26 Ibid. 102.
Based on the CEFR and the dialogues in the ECBCG, I compiled the following list of general linguistic, lexical, grammatical (accuracy) and phonological competences that the A2/B1 user of English for Border Guards needs.

Table 2: General linguistic, lexical, grammatical (accuracy) and phonological competences necessary for the A2/B1 user of English for Border Guards. Source: Compiled by the author, based on the CEFR.

<table>
<thead>
<tr>
<th>Level</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A2/B1</td>
<td>Has a repertoire of basic language which enables him/her to deal with everyday job-related situations. Can use basic sentence patterns and communicate with memorised phrases, groups of a few words and formulae, and simple speech functions to satisfy simple needs (communicating personal details, wants and needs, request for information, carrying out daily routine). In unpredictable, non-routine situations he/she will generally have to compromise the message and search for words. Grammatical and lexical limitations cause repetition and even difficulty with formulation at times.</td>
</tr>
<tr>
<td>A2/B1</td>
<td>Has a sufficient vocabulary to express him/herself precisely on routine, job-related topics and with some circumlocutions in other, well-known topics and to conduct routine, everyday transactions involving familiar situations and topics. Shows good control of elementary vocabulary but major errors still occur when expressing more complex thoughts or handling unfamiliar topics and situations.</td>
</tr>
<tr>
<td>A2/B1</td>
<td>Communicates with reasonable accuracy in familiar contexts; generally good control though with noticeable mother tongue influence. Errors occur, but it is clear what he/she is trying to express. Uses reasonably and accurately a repertoire of frequently used ‘routines’ and patterns associated with more predictable situations.</td>
</tr>
<tr>
<td>A2/B1</td>
<td>Pronunciation is clearly intelligible even if a foreign accent is sometimes evident and occasional mispronunciations occur.</td>
</tr>
</tbody>
</table>

Figure 1: Overall language proficiency. Source: Council of Europe, Language Policy Programme, Education Policy Division (2018) 30.
Clear pronunciation with an occasional evident foreign accent is manifested in the ECBCG material in the recorded dialogues, which were made by border guards of various nationalities.

The vocabulary defined by the English language activities described in the CCC is closely related to the terminology required at A2/B1 level. Looking at the collection of words and phrases in Appendix 1, it is obvious that it also comprises words of the general language which the border guards considered important to include in the learning material as items essential in typical professional communicative situations. This also supports the statement made in the first paper of this series that oral communication between a border guard and a passenger (a professional and a non-professional) is conducted in a language which is only partly specific-purpose.27

**Sociolinguistic and pragmatic competences**

Sociolinguistic competences comprise knowledge and skills needed from the sociocultural aspect of language use, e.g. rules of politeness, linguistic markers of social relations, register differences.28

Pragmatic competence – among other things – means that the language user knows the principles according to which organised, structured and arranged (discourse competences, e.g. flexibility, turn taking, coherence and cohesion) and according to which spoken discourse and written texts are used in communication for particular functional purposes (functional competences, e.g. oral fluency and propositional precision).29 Based on the CEFR and the dialogues in the ECBCG material, the A2/B1 level user of English for Border Guards needs the following competences:

**Table 3: Sociolinguistic and pragmatic competences necessary for the A2/B1 user of English for Border Guards. Source: Compiled by the author, based on the CEFR.**

28 Council of Europe (2001) 118.
29 Ibid. 125–130.
In the dialogues written for the ECBCG material we do not find hesitation or reactions to surprising turns in the conversation that are so typical of real communication (especially at this proficiency level), as the aim of border guards who compiled the dialogues was to construct ‘textbook’ models, that are standards to be followed.

**Summary**

I think that I have managed to prove the two hypotheses formulated in the introduction to this paper.

The sample dialogues created by border guards for the ECBCG courses contain most of the information to be collected as recommended by the CEF Professional Profile. Context information (location, persons and communicative situations) is usually in the Narrator’s text and the most frequent routine situations are described by the dialogues themselves. In fact, although it lacks linguistic analysis (which can actually be added later), this needs analysis method is more efficient for gathering corpora in order to compile a curriculum than conducting interviews and observing communication at various service locations, even for a longer period of time.

I think I have also managed to define some of the EBG competences, by adapting CEFR descriptors to border guards’ communicative activities as described in authentic sample dialogues. It is obvious though that when trying to carry out such a task, one faces a difficulty always present when trying to define competences, which applies both to the CEFR and to the SQF for Border Guarding. Although for those having professional experience in the relevant field it is clear what these definitions mean, I think we can agree with the criticism often mentioned concerning the CEFR that terms such as ‘basic’, ‘sufficient’ ‘enough … to’ ‘generally’, ‘sometimes’ and ‘without too much effort’ etc. are too vague.

Thus, I consider these descriptors to be only one version of EBG competences and a first attempt to define them. I wish to invite colleagues to continue this work and compile more complex and precise descriptions, also for B2/C1, which I wish to discuss in the third part of this series of papers.

A customs officer will check your gun and documents.
After basic training we have to participate in specific courses depending on the area we are going to work in.
Are you here for business or pleasure?
Are you married or single?
Are you serious?
Are you talking about the blonde woman’s case?
Asylum please!
Before the shift starts you have to pick up your equipment from the duty officer.
Can I see your team leader?
Can you show me that money/credit card?
May I see it please?
Can you show me your visa or residence permit?
Can you tell me your date of birth?
Crossing the border is only allowed during the fixed opening hours.
Do you have a reservation for the hotel?
Do you have a hotel reservation?
Do you have any brothers or sisters?
Do you have any children?
Do you have any enrolment letters?
Do you have any other funds?
Do you have the mother’s permission to take the child out of the country?
Do you use the same equipment?
External borders may be crossed only at border crossing points.
Give him my regards.
Good morning/Good afternoon/Good evening.
Have a safe trip.
Have you been to Europe before?
Have you been to this country before?
He might be smuggling something.
He must have lost some weight.
Here is your new office with a metal locker for your gun and holster.
Here you are.
How long are you going to be deployed here?
How long are you going to stay?
How long will you stay here?
How many days/weeks/months do you stay?
How many days are you going to stay?
How much money do you have with you?
How much money do you have?
How old are you?
How was your first shift?
I am here for a trade fair.
I am here for skiing.
I am studying here.
I am travelling with my pregnant wife and my step daughter.
I can check the VIN.
I check and examine suspicious documents.
I have 3 years’ experience.
I have a credit card.
I have to check the data base.
I have to refuse you entry.
I need to deal with this queue first.
I see you have a new Thermo Vision Van.
I started as a first line officer 16 years ago.
I think there are boxes of cigarettes hidden under the coal.
I want to visit my parents-in-law.
I was born in...
I was born on...
I was stressed because we had a long line of passengers waiting.
I will be your tutor for the next few months.
I will deal with your case as soon as I can.
I will find something when I get there.
I work in a team.
I’ll introduce you to our daily tasks and responsibilities.
I’m a document expert.
I’m a first line officer.
I’m a passport controller.
I’m a tourist.
I’m a first line officer and I specialise in the identification of vehicles.
I’m a guest officer participating in a Frontex operation and I’ve just arrived.
I’m the chief of this BCP.
If you have any questions don’t hesitate to contact me.
In my case, it was detection and apprehension of armed persons.
In order to enter you need more money.
It’s not enough.
Let me show you our border crossing point.
Let me show you the office of our document experts.
May I see the letter of parental authority please?
My flight leaves at 4:30 pm.
No irregular migrants so far in our area.
No, it has been trained in basic tracking and protection as well.
Non-EU-country nationals are subject to thorough checks.
Open the passenger door and glove compartment.
Our police station usually has patrols with that equipment.
Please open all of the car windows.
Please open the bonnet.
Please show me your return ticket.
Please stay in line and wait your turn.
Please wait here. Someone will come and see you shortly.
Since then my profile has been advanced level document expert.
Sorry, can anybody put a seal in my passport?
The taser is considered a non-lethal weapon.

The BCP is under constant surveillance, there are cameras and the duty officer can observe all activities.
The facilitator tried to escape and we needed to use force.
The family name of the child is different to yours.
The model year of your car.
The regular shift lasts 12 hours.
The visa is in my old passport.
Then I got some additional training for falsified documents.
There are no direct flights to Munich.
There is something suspicious in the cargo container.
This is my personal equipment.
This is my residence permit.
This is the equipment that my colleagues use on duty.
To enter the gates area, you will need your access card.
Today we are going to teach you how to use our new document reader.
Try comparing the colour of the eyes and the shape of the face and nose.
Try comparing the shape of the ears.
We also needed to handcuff him.
We became suspicious about their identities.
We have already been working together in the border guard service for 5 years.
We have detected something suspicious in train number 42.
We share parental custody.
We used our dog to apprehend him.
We worked together during a joint operation.
We’ve just finished our shift and dealt with several cases.
Well, can you please give me your e-mail address?
What are the training requirements for dog handlers?
What do you do at the airport?
What is the calibre of your fire arm?
What is the purpose of your visit?
What is the reason for your trip?
What is your destination?
What is your place of birth?
What kind of equipment are you carrying on your utility belt?
What kind of force did you use?
What time is your flight?
What’s your family name?
What’s your field of expertise?
What’s your real date of birth?
What’s your real name?
When do you plan to return?
Where are you going?
Where have you come from?
Where were you born?

Which were the risk indicators in this case?
Why have you come to Italy?
You always have to wear your uniform and bring your badge.
You are not allowed to enter our country without a valid visa.
You must wait here until we have dealt with your case.
You will learn how to identify risk indicators in the field.
You will practise your skills making a tactical risk analysis.
Your documents, please.
Your main task will be checking passengers and their documents.
Your passport/visa is no longer valid. Your passport/visa has expired.
Your passport and ticket, please.
Your residence permit has expired.

A group of irregular migrants is escaping from our patrol. All the documents are in order. Are these all of your passengers? At land BCPs in Finland, heavy commercial traffic is processed by a one-stop method.

Border Guard Service, Customs and Veterinary and Phytosanitary inspection. Border guards have received basic customs training. Checks shall be carried out both on train passengers and on railway staff. Could you lift the blanket up off the floor?
Did you apprehend those irregular migrants that I reported yesterday?
Do you usually keep the luggage compartment locked?
Don’t come out or we’ll have to use force. Ensure the safety and smooth flow of road traffic.
Get out of the car.
Get undressed.
Have you got a passenger list?
I am afraid that you will be refused entry.
I can see there is a sticker from a car rental company.
I just wanted to check that you are authorised to leave the territory of the EU in this car. 
I see that you are carrying an extra passenger.
Identify yourself.
Immigration officers are dealing with their case now.
It helped us to detect and detain the migrants.
It is forbidden to cross the border at this point.
Italian heli is pursuing the group of escaping irregular migrants near the village of Dragon.
Member States may cooperate with neighbouring countries.
Move the child seat and take the spare tyre out.
My colleague will check this with the rental company.
My colleagues will inspect the exterior of the vehicle using a dog.
Next time you will be fined.
Organise a team and send them here to help us.
Our dog-handler team apprehended them and two facilitators later.

Persons may be requested to alight from their vehicles.
Persons or objects subject to border checks are not concealed.
Persons travelling in vehicles may remain inside them during checks.
Please follow my colleague and he will direct you to the exit.
Please park in the designated parking place.
Put her in a safe position
Search the interior of the vehicle.
Separate lanes at certain border crossing points.
Smugglers might use rubber boats to bring boxes from the neighbouring country.
States may conclude bilateral agreements.
Thank you for your cooperation!
The border guard may order the cavities of carriages to be inspected.
The female migrant is pointing at her bump/belly.
The head of our BCU has ordered you to occupy the road from Dragon to Snake in order to apprehend all the irregular migrants.
The interpreter is on the way.
The patrol is ready for their border surveillance tasks.
The person has a previous record for trafficking in human beings.
The search has been completed
The serial number is OK.
The tactical situation at the border is clear.
The valuable information you provided us with.
Thermal imagers don’t require light.
These devices are used during normal patrol activities near the border line.
They are going to use a facilitator’s car.
They can see persons crossing the border where it is prohibited.
This black device is Night Vision Goggles. This equipment in front of you is very interesting.
This is a thermo vision van, it’s also called a “TVV”.
This is an external border of the European Union.
This is sensitive information.
This is the CO2 detector.
This vehicle is equipped with some special tools and devices.
We are on a European trip as part of our holiday.
We expect cigarettes to be smuggled across the river.
We had no intention of crossing the border.
We have a group of undocumented migrants here.

We worked late last night until their case had been resolved.
We’d like to examine the vehicle using a dog.
Welcome to the border crossing point.
What kind of documents would you like to see?
With your binoculars you can spot a man far away.
You are going to observe the coastline and its surroundings.
You are only allowed to cross it at border crossing points.
You can use a spike mat and other appropriate coercive measures.
You’ll be questioned.
You’re doing important work to keep our borders secured.

Access to this area is only allowed with a security pass.
Are you carrying any prohibited items?
Are you nervous? Why?
Because you have a pacemaker, you need to go around the metal detector.
Can you tell me the way to the Post Office please?
Did you pack your luggage yourself?
Do you have a laptop with you?
Go to the check-in counter for your airline to get your boarding pass.
How can I get to the city centre?
I have got a pacemaker.
If you have a pacemaker, please show me the medical certificate.
Is it far from here?
Is there a restaurant or a bar here?
Is this your bag?
It is around the corner.
It is just behind you!
It is opposite the transit area.
Nobody is allowed to enter.
Not as far as I know.
Please follow the exit signs!
Please leave this area right now!
Please open your bag.
Please remove your belt before passing through the metal detector.
Please take off your jacket and coat and put them in the tray.
Please take your laptop out of its case and place it in the tray.
Please wait.
Sharp items are not allowed in your hand luggage.
Sit down. I will call an ambulance.
Spread your arms wide please.
Switch it off please.
Take bus number 34.
Take the first turning on the left.
Take the lift and go up one floor.
There is a bus stop and a train station opposite.
There is a fire on the second floor.
This area is closed (is a blocked area).
This is a restricted area, nobody is allowed to enter.
This is an emergency situation.
This is the security control.
Try to breathe slowly and deeply.
Turn around please.
Walk straight ahead and then go left.
What is his nationality?
What kind of passport does he have?
Where is gate number 8?
Yes, I am because I’m afraid of flying.
You are not allowed to leave your luggage unattended at any time!
You can ask at the information desk over there.
You cannot take that with you.
You need to go downstairs and you will see the exit.
You will see the Post Office on your right.

A merchant ship is reporting that they have a man overboard.
A trawler (fishing boat) asks for help.
A yacht reports that they have a fire in the engine room.
After the arrival of a cargo ship a shipping agent comes to the BCP.
As there are no risk indicators.
Be aware of tankers!
Be ready on the deck with a rope and life buoy.
Before you discharge your cargo we will search your hold.
Calculate an interception course.
Calculate the search pattern and radius considering the datum and the weather conditions in the area.
Call the crew on deck and lock up the stowaways.
Can I have the crew list, certificate of registry, logbook, the list of last ports of call, narcotics list, crew effects list, bond store and ship’s particulars?
Can you put down the pilot ladder?
Captain, a new target has been detected on the radar.
Captain, can you gather the crew on the deck for identification?
Complete the embarkation formalities.
Conducting the vessel or persons on-board to the shore.
Contract with the Shipping Company has just expired.
Do you have any transit passengers?
Do you require any medical assistance?
Don’t abandon the vessel.
Don’t leave the fairway.
Everything is written down on the ship’s particulars.
Form for seafarers in transit who are subject to visa requirements.
Full speed ahead!
Have your life boat ready in case of any problems during towing.
He is suffering from hypothermia and he needs medical assistance.
He probably got on board during our stay in the last port of call.
He was hiding in one of the holds.
Here are all the manifests.
Here is the transfer request and the travel documents.
How long have you been at sea for?
How many people are on-board?
How many people are on-board?
I am here to request the disembarkation of a crew member.
I am in danger of capsizing.
I assume that you can't issue the free practice for this ship.
I expect to reach you in 10 minutes.
I have ordered the captain of the ship to alter his course to the harbour.
I have problems with my propeller.
I need the crew list and the ID cards or seaman's books.
I need to check your luggage.
I need to see the crew list, the passenger list, the general declaration, the crew effects declaration, the dangerous cargo declaration, the port of call list, NIL list and the ship's particulars.
I see that you are anchored here.
I want a security guard at the gangway.
I want to go to the peak room.
I want to transfer a crew member.
I will inform the Sanitary Authorities.
I would like to see the crew effects declaration.
I'm coming to your assistance.
I'm going to relay your distress call and send you a raft.
I'm just the skipper.
I'm not under command.

I'm not under command.
Is the crew ready?
Is there already an on scene coordinator (OSC)?
It is towing a small rubber boat.
It should be a sailing vessel.
It's amidships starboard side on the main deck.
It's foggy, I can't see the lighthouse.
It's under my berth.
Its waterline is too low.
Master, can you tell me how many people are on-board?
Mayday! Mayday! Mayday!
Monitoring the roadstead and the marine traffic on the sea lanes.
Naval bases should be chosen according to the ship's draught and availability of mooring posts.
No person overboard.
Ordering the vessel to alter its course.
Our mooring line was too tight.
Passenger acting suspiciously.
Perform the border check on entry.
Please show me your passports and certificate of registry.
Please wait while we prepare the form for refusal of entry for that passenger.
Prepare the pilot ladder on your starboard side.
Seizing the vessel and apprehending persons on-board.
Set course for interception, and increase speed to full ahead.
Shut down all systems on board including the power plant.
Some buoys are unlit.
Someone will come to interview you.
Stop your engines and prepare the vessel for boarding!
Switch to VHF channel 9.
Take your protective equipment.
The boarding team is ready and has already been instructed.
The border check for persons on cargo ships is carried out on-board.
The border guards found a stowaway hidden in the hold.
The captain provides a list of the crew and passengers.
The ETD (Estimated Time of Departure) is 19.00.
The hull is white with two portholes.
The identification of passengers that go ashore is carried out in the Passenger Terminal.
The identity check for the crew members is carried out in the cabins or at their place of work.
The man in the water has been recovered and secured on board.
The migrants are your responsibility now and they cannot leave the ship under any circumstances.
The power generators are operational.
The presence of any stowaways on-board.
The rest of the crew can go to their posts.
The sea state is not good.
The swell is dangerous.
The thermal camera is also connected to the emergency batteries.
The validity of the documents is checked on-board.
There are some gusts.
They tried to contact you by semaphore.
This is a French Customs cutter, can you read me?
This is the normal procedure.
This person must remain on-board.
This ship is carrying a dangerous cargo.
To fill out a form.
We are having problems with the AIS (Automatic Identification System) and the sonar.
We are heading to Malaga Harbour.
We are investigating a sloop.
We are proceeding to your position.
We are using the emergency batteries for communication.
We can observe two people on the stern and another one on the port side.
We can summarise this as: detection, tracking, identification and interception.
We consider him a stowaway.
We have been informed of a possible case of illegal fishing in our internal waters.
We have received a distress call on channel 16!
We have seen something on the water with the binoculars, adrift at about 1 nm (nautical mile).
We must pay attention to a warship entering our bay today.
We need some new ropes and a new GPS for our tender.
We require immediate assistance!
We were in the shipyard cleaning the hull and the keel.
We will begin the departure manoeuvre!
We will continue surveillance on the contiguous zone.
What about your endurance?
What is the colour of the hull and the length of the sloop?
What is the position of the vessel in distress?
What is the situation on the bridge?
What is your cargo?
What is your flag?
What is your next port of call?
What was your last port of call?
What’s your Estimated Time of Arrival (ETA)?
Which flag is it flying?
You are in a dangerous area and we will tow you.
You can drop anchor and moor.
You need to present an embarkation request.
Your AIS is not operating.

**Appendix 4. Sample Dialogues from English Communication for Border and Coast Guards, Level 1**

(Abbreviations in the dialogues: PA: passenger, NA: narrator, BG: border guard, LD: lorry driver)

1. 
BG: May I see your passport please?  
PA: Of course. Here it is.  
BG: What is the purpose of your visit?  
PA: Leisure.  
BG: How long will you stay?  
PA: Two weeks.  
BG: What plans do you have for your stay?  
PA: Nothing special, just sightseeing.  
BG: Have you got a hotel reservation?  
PA: No. I hope I’ll find a room somewhere.  
BG: How are you planning to get back home?  
PA: I don’t know yet.  
BG: How much money do you have with you?  
PA: 100 Euros.  
BG: I’m sorry but you can’t enter Italy.
But why?
Because you don’t have enough money to support yourself and to buy a ticket home.

Good evening.
Your passport, please.
Here you are.
Your visa has expired.
No, my visa is valid until the end of this month.
I’m sorry, but your visa was valid for a ten-day visit between the 10th of May and the 11th of July. You have already been in the Schengen area for ten days. This means that your visa is no longer valid.
No, my visa is valid. I have to enter your country because I am here for business and my colleagues are waiting for me.
Calm down. You are not allowed to enter our country without a valid visa. Please wait here. Someone will come and see you shortly.

The conversation takes place at a border crossing point (BCP). The newcomer is being introduced to the daily tasks and responsibilities at the BCP. It’s his first day at work. BG1 is explaining the tasks to BG2 and presenting the officer’s personal equipment.
Hello. My name is Codin. I’ll introduce you to our daily tasks and responsibilities at the border crossing point.
Hello. I’m Milla. Nice to meet you.
Well, your main task will be checking passengers and their documents. Let me show you the BCP.
Fine. Let’s go.
BG1 and BG2 go outside. BG1 explains as they walk.
The regular shift lasts 12 hours. Before the shift starts you have to pick up your equipment from the duty officer.
What kind of equipment will I need on duty?
Radio, handcuffs, firearms and ammunition. You will also have a torch and truncheon.
What about the stamp?
You will get it later after passing the exam.
All right.
The BCP is under constant surveillance, there are cameras and the duty officer can observe all activities.
OK.
I will be your tutor for the next few months. If you have any questions, don’t hesitate to contact me.
That’s fine. Thank you very much for your help.
